

Prevent Problems, Save Money, Stay Warm

Few people can afford the expense or inconvenience of a broken heating system. It usually happens at the worst time—like in the middle of a cold snap.

That's why Waldo County Oil & Propane customers choose our Maximum Efficiency Service Plan to enjoy peace of mind—and save money, too.

This plan is available for all customers, whether you call for your deliveries or get them automatically and whether you use heating oil or propane. It guarantees you:

- ▼ **24/7 priority emergency service** ahead of non-plan customers.
- ▼ An **automatic discount of 15%** on parts and labor for any necessary repairs with absolutely no exclusions.
- ▼ An **annual heating tune-up**, including up to 3 hours of free labor and a 15% discount on parts.
- ▼ **\$50 in annual Loyalty Credits**, up to \$500 total.

Don't wait until the next heating problem happens before you enroll. Get covered now and enjoy warmth without worry all winter long.

Maximum Efficiency Service Plan

Annual Tune-Up

A tune-up will be performed once a year during regular working hours. You'll receive a courtesy call from us to schedule this service, which is essential to keep your system running properly. Here are steps we may take during your tune-up, depending on the type of heating system you have:

- ▼ clean heating unit, vent pipe and chimney base
- ▼ check thermostat
- ▼ adjust burner for maximum efficiency
- ▼ clean & adjust electrode and nozzle assembly
- ▼ clean pilot assembly
- ▼ lubricate motors, bearings, fans and circulators
- ▼ replace oil nozzle and oil filter
- ▼ change air filter
- ▼ test and adjust safety and operating controls
- ▼ inspect barometric damper, combustion chamber and heat exchanger
- ▼ test oil pump operation
- ▼ check pressure at gas valve
- ▼ check fuel tank and lines
- ▼ test and tighten all wiring and connections

Why Are Tune-Ups so Important?

Our records show that four out of five system breakdowns could have been prevented with regular maintenance.

A tune-up lowers the chance of your system breaking down, keeps it running at peak efficiency, reduces your heating bills and extends the life of your equipment. That's why a tune-up is the cornerstone of our Maximum Efficiency Service Plan.

Why Waldo for Your Tune-Up?

Other companies may send inexperienced, inattentive and unaffiliated subcontractors to your home for tune-up service. **Not us!** Our own certified heating oil and propane technicians complete all work. They receive continuous training and have the resources to solve any problems they encounter.

Loyalty Credits

You earn **\$50 per year, up to \$500 total**, for each consecutive year you remain a service plan customer. You can apply these credits toward the replacement of your furnace, boiler or oil tank with us. So, your plan isn't just covering you this year; it becomes an investment in your eventual system upgrade.

When you're ready, you can apply your Loyalty Credits for equipment you purchase from us.

Terms and Conditions

- Customers must purchase their heating oil or propane in its entirety from Waldo County Oil & Propane.
- Customers will have a tune-up annually so we can properly maintain the heating unit and reduce emergency service calls.
- Customers can purchase multiple plans if they have more than one heating system in the home.
- Complete heating replacement coverage is not included.
